- Diagnosed and repaired iPhones and other mobile devices and accessories
- Handled customer service, product recommendations, and after-sales support
- Oversaw inventory management and coordinated with suppliers

PROJECTS

Job Applicant Screening Automation — Automation Developer *2026*

- Built an automated workflow to stop qualified job applicants from being missed by HR
- Automatically receives applications, checks the applicant's years of experience, and sends an interview invite or rejection email accordingly
- Notifies HR automatically at each stage, removing manual screening and follow-up

Daily Research Digest Chatbot — AI Developer *2026*

- Built a chatbot that automatically researches a chosen topic and compiles a summary
- Runs on a recurring daily schedule to deliver updates without manual searching

Noteify — Web Developer *2024 – Present*

- Built an all-in-one workspace app for note-taking, task management, and organizing pages and documents in one place
- Currently live and being offered for sale as a standalone product: noteify-eta.vercel.app/app

Mobileplace Inventory Web App — Web Developer *2024 – Present*

- Built and deployed a web application to manage stock, track sales, and monitor revenue for Mobileplace.NG, replacing manual record-keeping with a real-time digital system
- Implemented role-based permissions and usability improvements based on real store use
- Built with HTML, CSS, JavaScript, and Python; deployed on Render
